Director / Head of Cloud Infrastructure & DevSecOps | Multi-Cloud Architect | Platform Engineering Leader

Portfolio: *https://and1025.github.io/portafolio/*

Professional Summary

Cloud Infrastructure and DevSecOps leader with 10+ years of experience designing and governing enterprise cloud platforms across Latin America. Specialist in AWS, Google Cloud and Azure with strong focus on cloud governance, platform engineering and DevSecOps transformation in regulated industries such as financial services and insurance.

Experienced leading multidisciplinary architecture organizations including Cloud, DevOps, AI and Data & Analytics architects. Proven ability to align infrastructure strategy with business objectives, implement secure multi-account landing zones and enable large-scale platforms for mission-critical systems.

Recognized for leading major cloud transformation programs including the migration of 68+ enterprise applications and the implementation of secure, highly available multi-cloud architectures supported by DevSecOps, FinOps and SRE practices.

Strategic Achievements

Led migration of more than 73 enterprise applications during the transition from Liberty Seguros to HDI Seguros.

Directed an architecture organization of 22 specialists including Cloud, DevOps, AI and Data & Analytics architects.

Designed AWS multi-account enterprise landing zones using Control Tower and security governance frameworks.

Implemented DevSecOps and SRE practices improving deployment speed, reliability and operational visibility.

Introduced FinOps practices to optimize cloud cost governance across enterprise environments.

Designed resilient multi-cloud architectures integrating AWS, Google Cloud and Azure.

Core Competencies

Cloud Infrastructure Leadership

Multi-Cloud Architecture (AWS, Google Cloud, Azure)

DevSecOps Transformation

Platform Engineering

Cloud Governance & Security Architecture

SRE & Reliability Engineering

FinOps & Cloud Cost Optimization

Enterprise Application Modernization

Professional Experience

Cloud Architecture Manager — Itera Process (2025 – 2026)

Led cloud architecture strategy and governance for enterprise clients across LATAM. Managed a team of 22 architects across Cloud Infrastructure, DevOps, Artificial Intelligence and Data & Analytics disciplines, defining standards for cloud governance, DevSecOps and platform engineering.

Senior DevOps Consultant — Ole Life (2025 – Present)

Responsible for DevOps strategy and cloud infrastructure operations across AWS and Google Cloud environments supporting business-critical platforms.

Principal DevSecOps Engineer & DevOps Lead — Liberty Mutual / HDI Seguros (2022 – 2024)

Technical leader responsible for DevSecOps practices and cloud architecture across multi-regional platforms in Latin America, Europe and Asia, including the migration of enterprise workloads during the Liberty to HDI transition.

Senior DevOps & Full Stack Engineer — Kibernum — 2021 – 2022

Senior Software Engineer / DevOps Engineer — ElasticDevTeam (Consulting) — 2020 – 2021
Delivered cloud engineering and DevOps solutions for multiple technology clients including Oky, Soft Dev Team and 321 Ignition, contributing to platform modernization, CI/CD automation and cloud infrastructure deployments across AWS and Google Cloud.

Earlier Career Experience

Senior Angular Developer — World Office Colombia — 2020

Full Stack Developer / Tech Lead — Emet Business Group — 2018 – 2020

Software Developer — Universidad del Magdalena (Software Development Center) — 2017 – 2018

Junior Full Stack Developer — Código Fuente TI — 2016 – 2017

Technology Stack

AWS (ECS, EKS, Lambda, RDS, DynamoDB, Control Tower, WAF, IAM, CloudFront) and more…
Google Cloud (Cloud Run, Cloud Functions, BigQuery, Composer, GKE) and more…
Azure (Compute, Networking, Storage)
Terraform, CloudFormation, Ansible
Jenkins, GitHub Actions, Azure DevOps
Docker, Kubernetes
Observability: CloudWatch, Dynatrace, OpenTelemetry

Education

Systems Engineering — Universidad del Magdalena
